

Andreas Mitschele-Thiel, Zubair Shaik

www.aivader.com

AiVader in a Nutshell

- Spin-off of Integrated Communications Systems (ICS) Group from Technische Universität Ilmenau
- Based in Ilmenau, Germany
- **Solutions**
 - **5G-in-a-box** solution for easy setup of test environments
 - **Ai-Luminos**: SMO for E2E management and orchestration of campus networks
 - **Ai-Savvy**: ML-based SON functions as xApps and rApps
- **Key Expertise**
 - ML-based radio network management (SON)
 - Application of xAI methods to network management chain
 - Prototyping of 5G systems and applications

Ai-Luminos: SMO for E2E Management

Deployment and configuration

Network deployment

1 Core configuration Set up the core config

2 RAN configuration Configure a Base Station

3 Deploy Network Push network configurations

TAC
Enter TAC number
1

MCC
Enter MCC number
001

MNC
Enter MNC number
01

Back Next step

Network deployment

Core configuration Set up the core config

3 Deploy Network Push network configurations

Add new BS

Select type of the BS
NodeB

ARFCN
Enter number from 620000 to 653333
650000

TDD Scheme
10: 5/4

Number of PRBs
106 273

TX Power
Enter number from 0 to 24
18

SCS
15 30 60 120 240

Add

Subscriber management

Core configuration

Subscribers
Empty subscribers list

Add new subscriber

IMSI
Enter IMSI of the new subscriber

Ki
Enter Ki

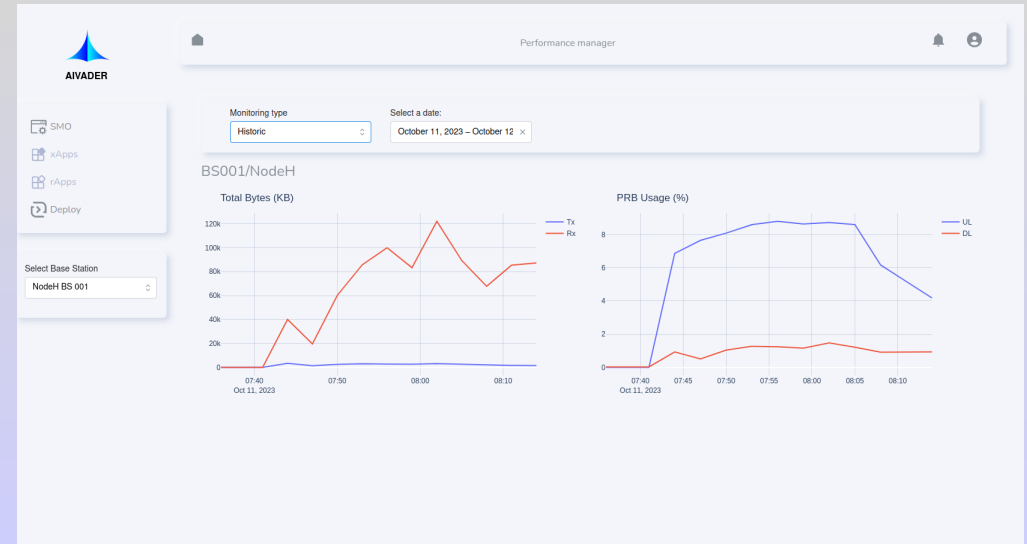

OPc
Enter OPc

APN
Enter APN

Submit

x Delete subscriber

Logging & monitoring

Ai-Savvy: ML-based Network Optimization

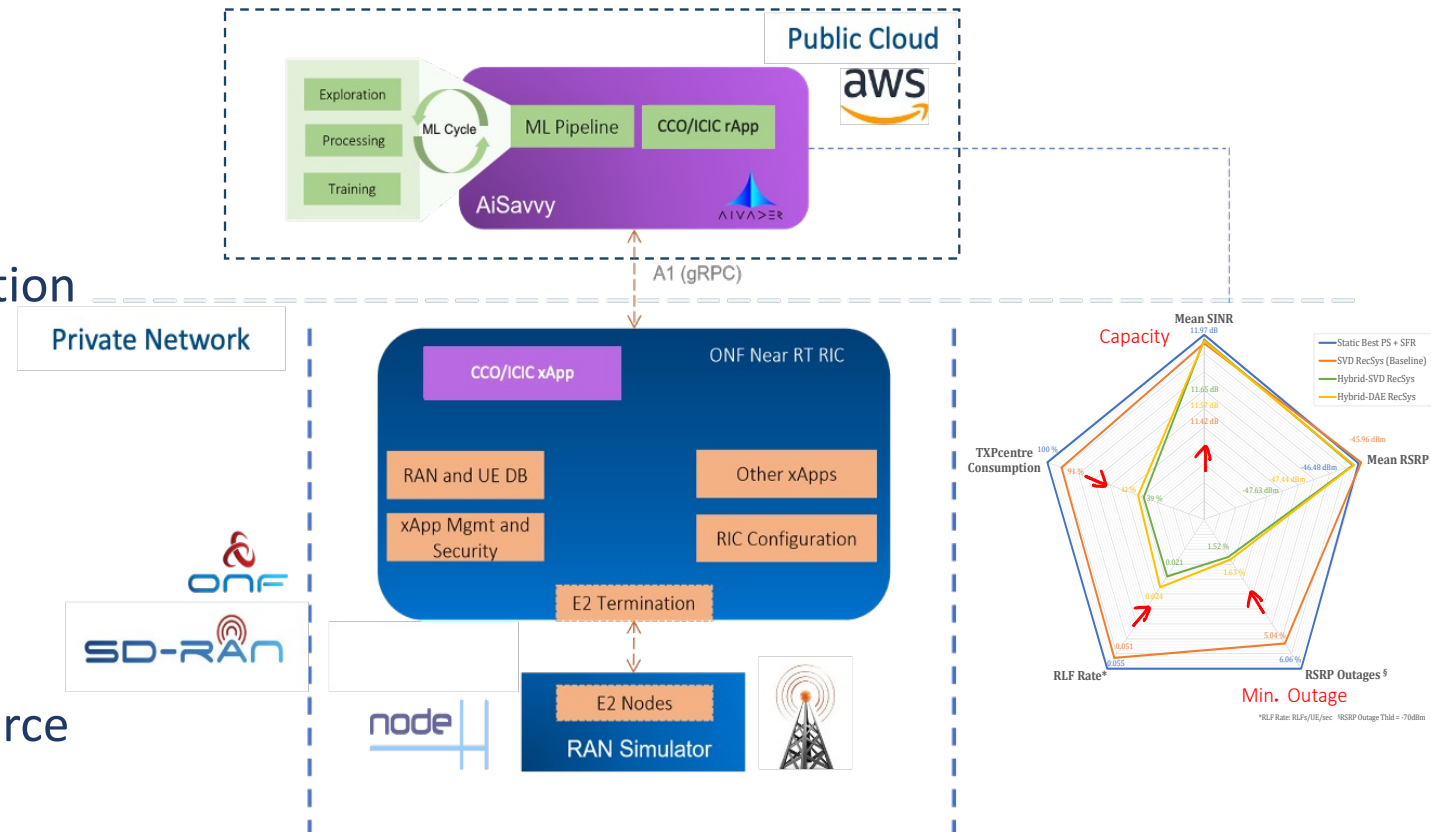

- **SON Functions** (rApps and xApps)
 - Coverage, Capacity and Interference Optimization
 - Energy Saving
 - Traffic Steering
 - Network Slicing
 - Mobility and Load Balancing Optimization

Tooling

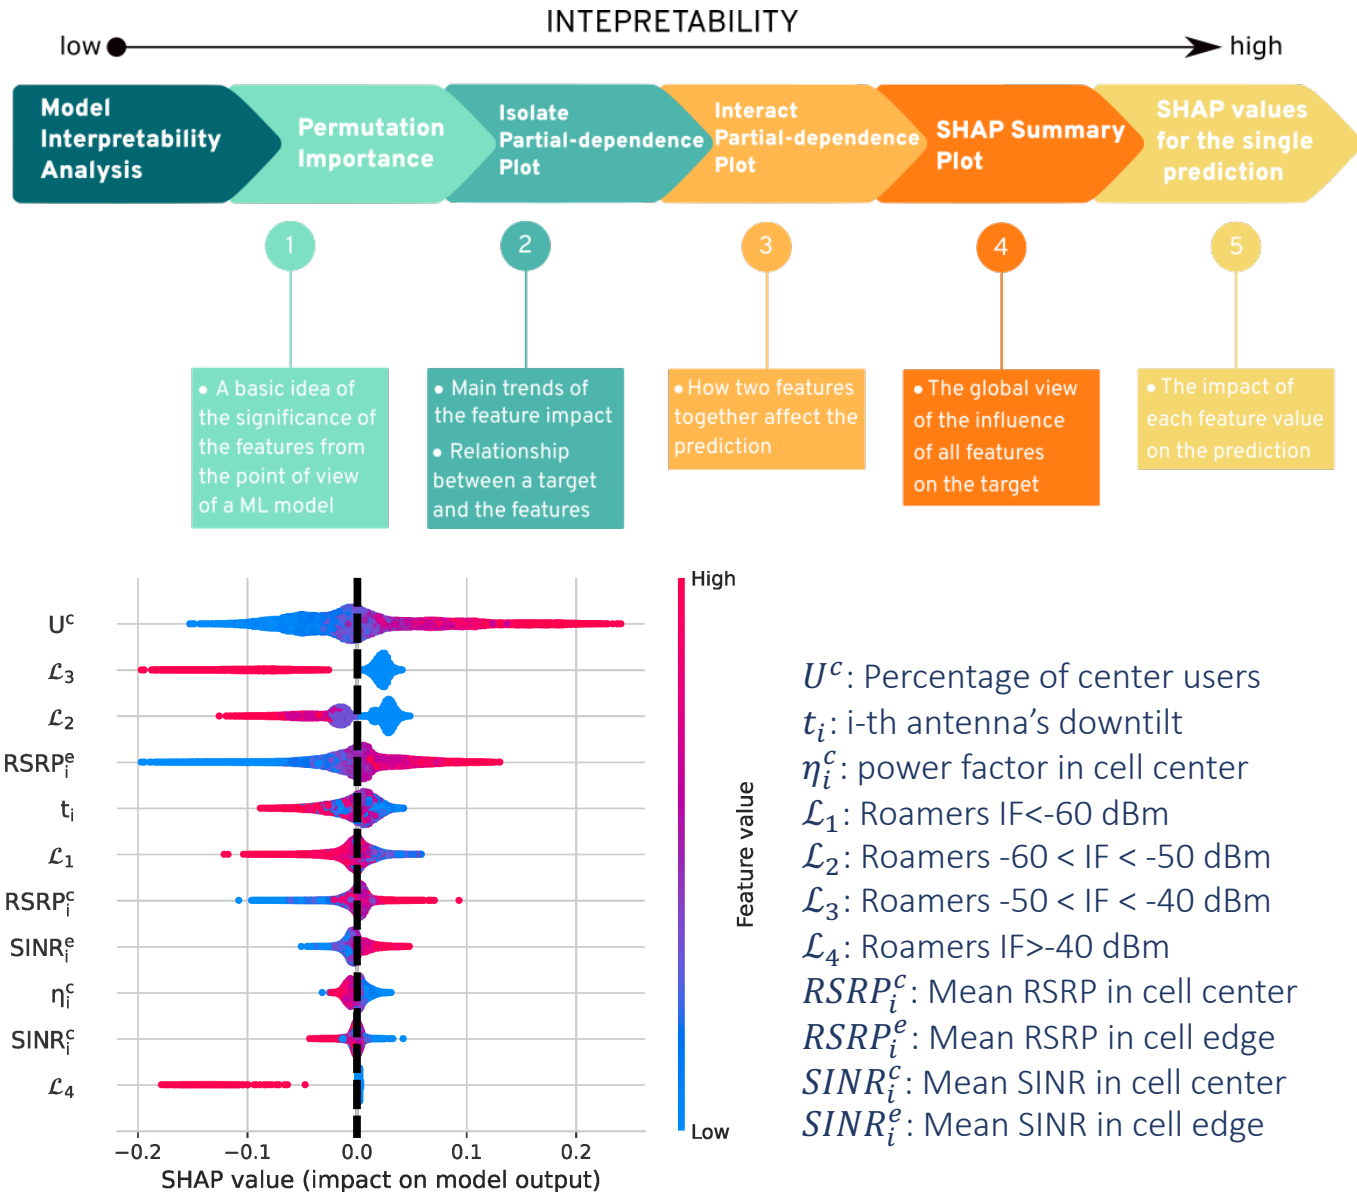

- Cloud- and Microservices-based architecture
- DevOps and MLOps

Validation

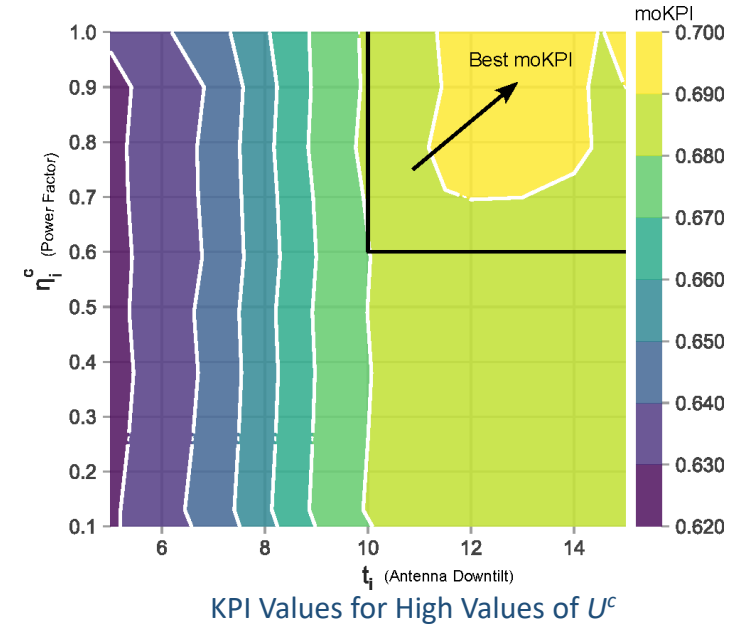

- Ecosystem with commercial, open-source and simulation components
- OpenRAN-based RIC

Explainable AI (xAI) Applied to Network Management

- xAI to gain a deep understanding of the problem, anomalies, and solution space
- A „computerized tomography“ scan of the ML model
- Example: impact of center load, tilt and center power on KPI

Reference: F. Nazmetdinov, D. Preciado and A. Mitschele-Thiel, "Trust Me: Explainable ML in Self-Organized Network Management," *2023 IEEE/IFIP Network Operations and Management Symposium (NOMS 2023)*, Miami, FL, USA, 2023 (Best Paper Award).

Projects & Partners

- **5G-KIMA:** AI-based network management of OpenRAN-based campus networks
- **5G-ECOnet:** Energy saving in campus networks
- **FraudDetect:** AI-based detection of fraud in distributed networks for the energy sector
- **6G Campus Ilmenau:** Flexibly expandable campus network with fast packet processing capabilities
