

# Introducing Pan-European 5G Living Lab

Deploy. Test. Scale.

# The Vision

**“ Accelerate your 5G/6G innovation through  
Europe’s premier testbed—built by  
a pan-European alliance of  
academic and industrial experts. ”**

# Test & Deploy Without Limits

5G/6G

Real-World Testing.

Zero Infrastructure Cost.

Access a single gateway to deploy your 5G and 6G applications in the environments that matter most. From underground mines to underwater facilities, we provide the hardware so you can focus on the software.

mines

underground

underwater

office

& more

Connect your facility to our pan-European ecosystem and lead the next wave of connectivity!

# Prototyping, Testing & Production

✓ **Rinicom Offers** turn key solutions, including system design, prototyping, testing, certification and production.

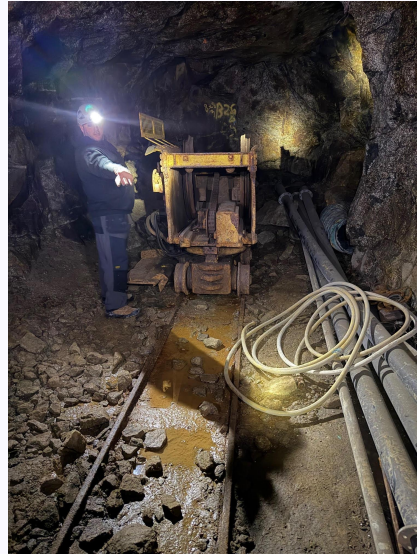

✓ **We possesses** in-house facilities for prototyping and production, including mechanical components.

✓ **We support** products with all the required documentations, including certifications and compliance testing.

✓ **We work** closely with our customers helping to optimise the final products.
