

Canon Research Centre France (CRF)

A CANON GROUP COMPANY

Canon

Canon Research Centre France S.A.S.

CRF BY NUMBERS

Located in Competitive
Research Area for
Image & Networking
Rennes (FR)

Active participation to 4
major SDOs

Contributions: JPEG2000,
DECT, Web services, HEVC,
VVC, DASH, IEEE 802.11,
3GPP

34 years in business,
Researching in
image processing
and networking

100% Canon Group
affiliated company

49 permanent staff
(41 Engineers & PhD)

€ 8.6 million
Gross profit in 2025

80% Global R&D
20% BU specific

100% EU inspired

334 consolidated
subsidiaries worldwide

170,340 employees

€ 29.1 billion net sales*
€ 1.0 billion net income*
*Exchange rate, 1€ = 155JPY

7.48% of net sales
spent in R&D

<https://global.canon/en/corporate/pdf/pdf/canon-story-2025-2026-e.pdf>

Industrial 7.9% **55.9%** **Printing**
Imaging 20.8% 12.6% **Medical**

Global R&D

- CRF is developing technologies in **imaging and communication domains, aiming at technologies to be standardized** to support Canon group business activities, worldwide.
- In close cooperation with Canon Inc and European Subsidiaries
- Leveraging CRF localization in Europe (Horizon Europe)

Canon Research Centre France S.A.S
Rennes, France
R&D of standard imaging and networking technologies

2 AXIS Communications AB
Lund, Sweden
R&D of network video solutions

3 Milestone Systems A/S
Copenhagen, Denmark
R&D of video management solutions.

4 Canon Medical Research Europe Ltd
Edinburgh, U.K.
R&D of clinical decision support systems AI automation

1 Canon Inc

Headquarters (Shimomaru) ... R&D Areas. Development of digital cameras, etc..

CRF participation in EU projects

- **SECREDas: 2018-2021 (completed)** <https://secredas-project.eu/>

- Improving Safety and Security of automated vehicles
- CRF: Detection in real-time of abnormal C-ITS messages

69 partners, 42 months

- **SELFY: 2022 – 2025 (completed)** <https://selfy-project.eu/>

- Toolbox for Self awareness, Self protection, Self healing in Trusty CCAM
- CRF: Road Side centred tools for situational awareness

16 partners, 36 months

- **ROADVIEW: 2022-2026** <https://roadview-project.eu/>

- More powerful and reliable on-board vehicle perception and decision-making technologies addressing complex road environmental conditions
- CRF: road infrastructure based robust perception system

16 partners, 48 months

- **MYRTUS 2024-2026** <https://myrtus-project.eu/>

- Computing continuum infrastructure for IA based cyber physical systems integrating edge, fog and cloud computing
- CRF: Edge compute continuum for mobility use case

13 partners, 36 months

- **iEXODDUS 2024-2027** <https://iexoddus-project.eu/>

- Enhancement of the continuity or expansion of ODDs (Operational Design Domain) for connected automated vehicles
- CRF: improved road side perception and coordinated decision making.

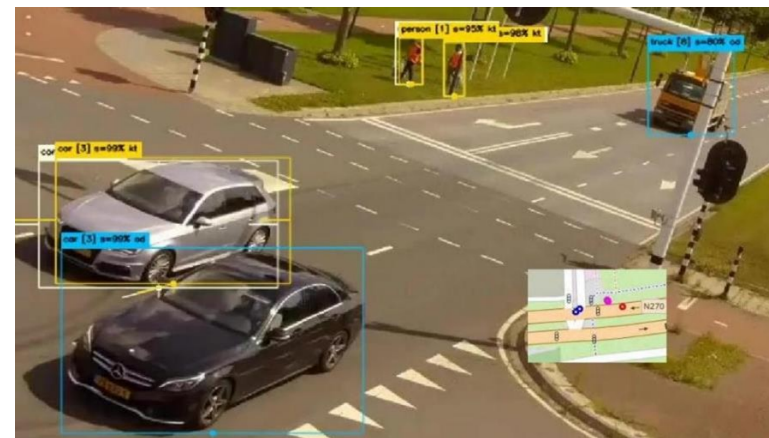

14 partners, 36 months

CRF Technology assets

- Multi modal sensing: cameras, Lidars
- Identification and tracking, by AI-powered VCAs
- Detection: cars, trucks, buses, pedestrians, cyclists
- 3D positioning & Geo mapping
- Generation of C-ITS CPM messages

Characteristics

- Frequency: 10 fps
- Position accuracy: 50 cm
- Lighting conditions: Daylight – Weather adjustable

Technologies of interest for CRF

- 6G sensing with UE camera in the loop for sensor fusion (e.g. vision aided sensing)
- Real time multimodal transmission for 3D scene capture enabling virtual worlds
- Network for AI and computing continuum for distributed, federated and sustainable AI data processing in multi-camera systems.
- Network exposure for seamless access to core network functions enabling better user experience and camera system optimization.

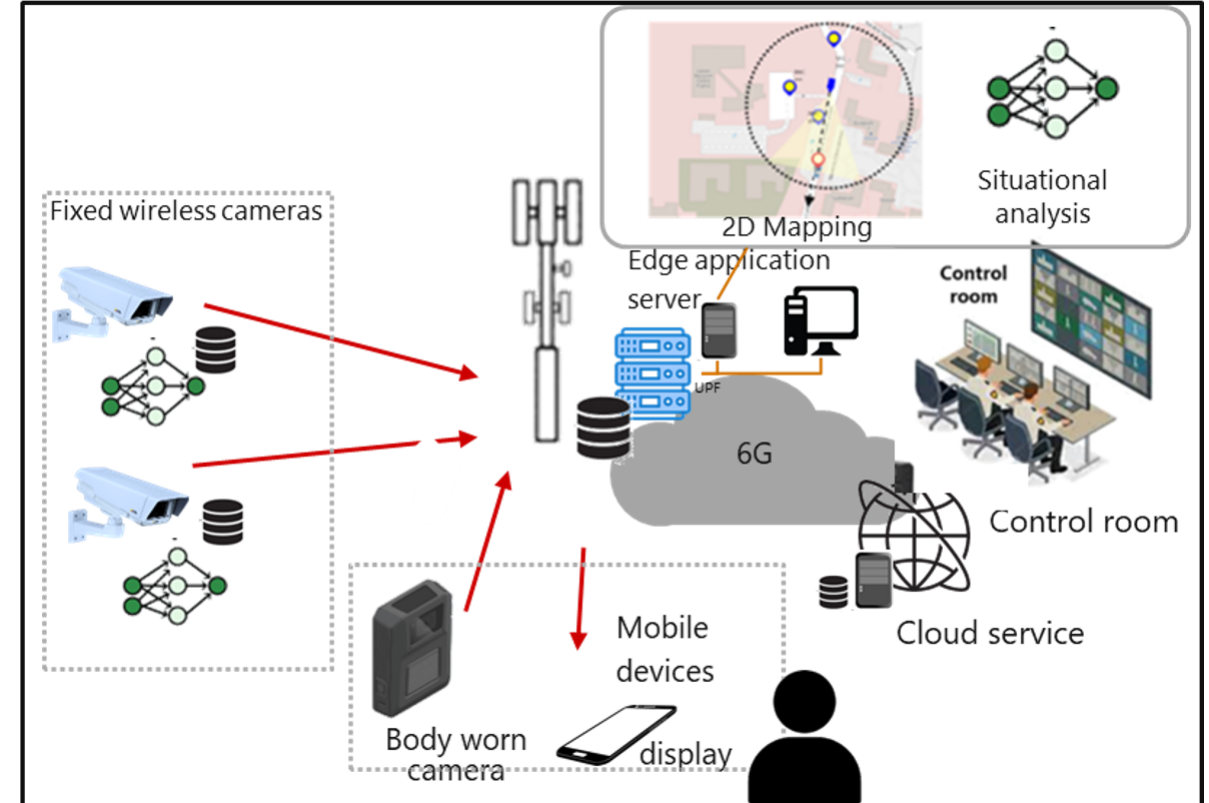

**The 6G
key features
to boost future
business**

Verticals we aim at

- Industry/Manufacturing (i.e. process monitoring, AGV, AMR),
- Transportation / Logistics
- Emergency and Safety Services, automated video surveillance
- Healthcare

CRF's multi camera solution for SNS

Horizon Europe calls for projects 2026 / 2027

CALL	CRF contribution ideas (example)
<ul style="list-style-type: none">• HORIZON-JU-SNS-2026-STREAM-B : Collection, Generation and Validation of Datasets suitable for training AI Models for 6G Networks	<ul style="list-style-type: none">• 6G multimodal dataset creation: metadata from camera (3D depth map, object classification, positioning, etc.) to complement 6G network data (sensing, positioning, heat map, etc.) for business intelligence, perimeter surveillance, etc
<ul style="list-style-type: none">• HORIZON-CL4-2026-04-HUMAN-01 : Developing and demonstrating core technologies for Virtual Worlds and Web4.0	<ul style="list-style-type: none">• Scene 3D capture (3D perception), real time transmission and visualization.
<ul style="list-style-type: none">• HORIZON-CL4-2027-04-DATA-03 : New approaches for decentralized, federated and sustainable AI data processing	<ul style="list-style-type: none">• Distributed AI-based vision processing between the camera edge, edge, fog, cloud continuum.
<ul style="list-style-type: none">• HORIZON-CL4-2027-04-DATA-08 : Demand-side 3C pilot demonstrators on converged Telco Edge Cloud Infrastructure	<ul style="list-style-type: none">• Others ...

Thank you
